

ETL Project Proposal

Data Sets:

<https://www.kaggle.com/nickhould/craft-cans?select=beers.csv>

<https://www.kaggle.com/nickhould/craft-cans?select=breweries.csv>

Type of transformation needed:

Joining, cleaning, filtering, aggregating

Final DB:

Relational (SQL)

Tables and collections that will be used:

Brewery counts by state from breweries.csv

Most popular type of beer from beers.csv

Which brand has the highest alcohol content from beers.csv
